

StatsTracker

The Modern Game: Stats Tracker is a simple to use app that counts, tracks and saves your team stats and notes throughout a game for you to share with your players at the breaks and keep as history for future reference during the season.

Simply enter in your own team name, the opposition team, what round it is, whether you would like to track the opposition stats, select the stats you would like to track and start a new game. It is that simple. At the end of each quarter, the game score will be recorded for that quarter and progressively, you can enter in game notes, move to the next quarter and all your game information from the previous quarter will automatically save. Throughout the game, with one simple tap, you can also compare stats live in the moment; for your team or in comparison against the opposition.

Main Features:

Fast entry of game details

Allows real time analysis of stats during the game & quarter by quarter

In a simple tap, tracks performance against the opposition

Captures the game score

Emails the data to your coaching team

Makes notes quarter by quarter and at the end of the game

Game data saves in history for quick reference

Timer automatically records the times for each quarter

Customize Stat Names, Stat Groupings, Team Names, Display colors, formatting, etc.
